

The image shows a code editor interface with a file explorer on the left, a main code editor in the center, and a terminal window on the right.

**File Explorer:** Shows a file named `index.js` with a JavaScript icon.

**Main Editor:** Displays the content of `index.js`. The code is as follows:

```
1  const http = require('http');
2
3  const { Server } = http;
4
5  const s = Server((req, res) => {
6    if (req.url.startsWith('/privet')) {
7      return res.end('Приветище');
8    }
9    else {
10     if (req.url.startsWith('/getkodaktorversion')) {
11       const { get } = http;
12       void get('http://kodaktor.ru/appver', (r, b = '') => {
13         r
14           .addListener('data', data => b += data)
15           .addListener('end', () => {
16             return res.end(String(b));
17           })
18       });
19     }
20     else {
21       if (req.url.startsWith('/api2/add/')) {
22         const parts = req.url.split('/');
23         console.log(parts);
24         return res.end(`Суммирование: ${+parts[3] + +parts[4]}`);
25       }
26       else {
27         if (req.url.startsWith('/api/add/')) {
28           let buffer = '';
29           req
30             .addListener('data', data => buffer += data)
31             .addListener('end', () => {
32               const body = String(buffer);
33               const parts = body.split('=');
34               const n1 = parts[1].split('&')[0];
35               const answer = `Суммирование: ${+n1 + +parts[2]}`;
36               console.log(answer);
37               res.end(answer);
38             })
39         }
40         else {
41           res.end('Путь не определен 15-12-2020');
42         }
43       }
44     }
45   });
46 }
```

**Terminal:** Shows the Node.js version `node v12.16.1` and a prompt character `>`.
